QUANTUMBIOSIS SOCIETY

BUSINESS & NFT COLLECTION

The Quantumbiosis Society is a community & company built around the fusion of web3, sci+fi, and cutting-edge technology.

Exclusive digital, collectible, NFTs (non-fungible tokens) living on the Ethereum Blockchain representing access to exclusive elements of the Quantumbiosis™ Society.

“Our goal is to build a thriving social community of like-minded individuals and, together, explore the frontiers of the digital world while having fun & rewarding people for their commitment!”

THE BUSINESS

CCG PROPERTY GROUP LLC

The CCG Property Group, an Arizona Limited Liability Company, conducts business under the registered tradename “Quantumbiosis Society” (QBS). The ‘QBS’ holds the trademark rights to the “Quantumbiosis” name and logo. The company holds State and City tax licenses in Arizona.

OBJECTIVES

The ‘QBS’ has a grand visionary strategy to establish a Web2/Web3 multimedia ecosystem that bridges the gap between science and the blockchain.

STRATEGY

The initial growth phase will be financed through the sale of ‘QBS’ digital collectable non-fungible tokens (NFTs) and social media monetization. The NFTs (Quantumbiosis Tardigrades) are a means to build the “Quantumbiosis Society” brand, raise capital, and establish an engaged community.

Exposure and brand awareness will be gained through social media and a dedicated interactive Discord server. The dedicated X account, @quantumbiosis, will focus on providing the public with information specific to sci-fi, science, and tech. This account is monetized and averages 5 million impression per fiscal quarter. The X account, @qbs_society_nft, will be the primary outreach specifically for NFT promotion and community engagement along with the founder account @qbs_founder “Quanta.”

Upon the successful sale of the NFTs, the company will offer tangible merchandise, host live events, expand into other forms of media, and expand the team.

More information regarding the specific vision and strategies for the NFT Collection are found in the remainder of this document.

■ WHAT ARE “NFTs”?

NFTS & HOW THEY WORK

Non-fungible tokens (NFTs) are digital assets whose ownership is verified on a blockchain. NFTs can be based on anything — original or custom artwork, sports memorabilia or even online gaming avatars. The transaction history and data associated with an NFT are made public on the blockchain and cannot be changed once verification is complete. An NFT owner can prove their claim without a doubt.

WHAT IS THE BLOCKCHAIN?

The "blockchain" is a record of transactions, especially those made in a cryptocurrency, maintained across computers that are linked in a peer-to-peer network.

WHY ARE NFTS POPULAR?

NFTs have become popular due to their ability to provide self-expression, social engagement, and investment potential, along with their unique artistic appeal and integration with social media platforms.

TEAM & STORY

■ THE TEAM

Quanta, the visionary creator behind the Quantumbiosis Society is a solo founder fueled by a love for science, sci-fi, and Web3. Supported by a close-knit circle of friends and family, Quanta’s mission is to spark a vibrant community. As the QBS grows, we will expand our team to bring even more innovation to the community. Quanta has several years of experience in the NFT/blockchain space and an extensive business background.

THE STORY

(A) PRELUDE & BEGINNING

∞ My fascination with the creativity & wonder of technology and science has only intensified as I have delved deeper into the realms of science, science fiction, books, and video games.

∞ THE GENESIS

∞ This love for these subjects evolved into a yearning to unite like-minded individuals who shared this passion. Thus, the Quantumbiosis Society was born! To forge meaningful connections among its members, I turned to the internet and, specifically, Web3.

∞ WEB3 & NFTS

∞ I sought a digital representation for the Quantumbiosis Society, something concrete yet 'non-fungible.' The concept of an NFT collection emerged during a time of deep contemplation.

∞ THE SUBJECT

∞ The blockchain is the embodiment of a digital eternity. Without the biological, the digital would not exist. The closest biological equivalent to a blockchain is the resilient and extraordinary Tardigrade! Yes, they are quirky looking, but we still love them!

∞ Tardigrades have existed for 500+ million years, are incredibly resilient, adaptable, and can survive in the most savage environments like extreme temperatures, radiation, and the vacuum of space! The Tardigrade inspired our name, The Quantumbiosis Society, with 'Quantum' representing a 'discrete quantity' (often the smallest) and 'biosis' signifying 'mode of life.'

∞ THE WORK

∞ Crafting the NFT artwork was an arduous endeavor that spanned nearly 2 years. My commitment to excellence led us to refine the core elements six months in, extending the company's timeline but ultimately yielding remarkable results.

∞ The images were painstakingly crafted using Adobe Photoshop on a MacBook Pro with just a touchpad. Pushing the computer to its limits, I often encountered memory issues and even wore a hole in my 'Command' button!

(Ω) THE COMMUNITY

∞ To establish a gathering place for the Quantumbiosis Society, I created a DISCORD server with an immersive experience for members. I eagerly await member arrivals and look forward to the server's growth and enhanced features for NFT holders.

"I may have started the Quantumbiosis Society, but it's true worth lies in the hands of its members. The genuine value of the QBS is, indeed, you!"

ARTWORK

“QUANTUMBIOSIS TARDIGRADE”

• NFT IMAGES

[1,000PX X 1,000PX | 300DPI | PNG]

• DESIGN

Every trait was handcrafted, a rarity in this day and age of A.I., by the company founder, “Quanta,” over a period of nearly 2 years!

• STYLE

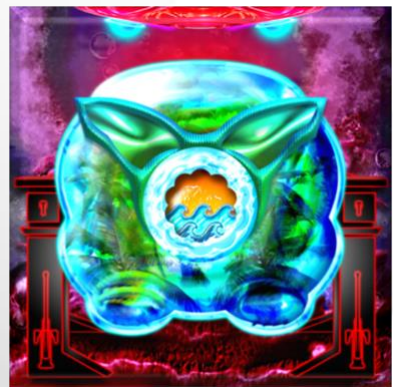

The art is designed to be stylish with vibrant colors and fun graphics. Every NFT has a combination of traits that is charming, yet cool. The NFTs are infused with the very essence of the Quantumbiosis Society; Science, Sci-Fi, Tech, Gaming, and Web3! Tardigrades are naturally quirky looking so we leaned into it!

• CHARACTER

The star of every NFT is the incredible Tardigrade! We have taken the spirit of these tiny yet mighty creatures and added our own out-of-this-world twist! There is our take on a “natural” Tardigrade and an additional 25 mind-blowing versions!

• TRAITS

Beyond the base character, there are an additional 161 traits that can potentially surround or be added to your Tardigrade! We have 8 additional categories of traits that are so spectacular you will be hard pressed to find them in any other NFT Collection!

Crypto Wallet

- MetaMask
- Coinbase Wallet

OpenSea

- An NFT marketplace where users can buy, sell, or create NFTs
- It is a noncustodial platform, allowing users full control and access to their cryptocurrency wallets

Helpful Links

- <https://metamask.io>
- <https://coinbase.com>
- <https://opensea.io>

HOW IT WORKS

STEP 1: SET UP AN ETHEREUM-COMPATIBLE CRYPTO WALLET

• You need to set up a wallet, preferably the MetaMask extension on Google Chrome or download the app on your smart phone. NFTs are sold and bought using cryptocurrency, you'll need some Ethereum (ETH) crypto tokens. You can buy cryptocurrency on your debit/credit card on various platforms. Once you make the purchase, you can transfer the funds to your digital wallet. Keep in mind that there will be extra charges when you exchange USD for Ethereum. The crypto wallet is where you store your tokens.

STEP 2: MINT AN NFT

• Minting an NFT means converting digital data into crypto collections or digital assets recorded on the blockchain.

• Visit our website: <https://quantumbiosis.io> and click on "MINT NFT". Click the "MINT" button and you will be taken to our **secure OneMint** page and will be asked to **connect your wallet**. You will be asked by your wallet if you want to complete the purchase via a digital signature. On the wallet extension or your phone, select "Sign". Depending on how active the network is it may take several minutes for the transaction to occur. (Please note you will be required to pay **Network Fees ("Gas Fees")** that will vary with network volume.) It may take a little longer for the NFT to appear on your OpenSea account and in your wallet.

Congratulations, you now own a Quantumbiosis Tardigrade NFT!

• You can also access the Mint page directly by visiting:
<https://mint.quantumbiosis.io>

• **NO ETH/WALLET, NO PROBLEM.** You can **utilize CrossMint's credit card option** to mint an NFT. The option is available alongside the wallet connect button.

STEP 3: SECONDARY MARKET

• You can purchase previously minted NFT's by visiting our OpenSea page: [https://opensea.io/Quantumbiosis Society](https://opensea.io/Quantumbiosis_Society). You can also make an offer to an existing owner or purchase them directly if they have any listed for sale.

• If a new user, you will need to register an account before you can start to interact with NFTs on OpenSea. Considered the largest peer-to-peer marketplace, OpenSea operates on Ethereum and hosts different NFTs and collections. Visit <https://opensea.io> to register an account. You need this to conduct transactions on the NFT marketplace.

.ROADMAP (NFT)

[Please note, our roadmap is subject to change based on project progress and community feedback.]

■ NFT COMMUNITY | ENGAGEMENT | VISION

COMMUNITY

- The driving force behind the Quantumbiosis Society NFT Collection is building an engaging community centered around the fusion of web3, sci+fi, and cutting-edge technology in a fun and entertaining fashion

ENGAGEMENT

- **SOCIAL MEDIA:** X and our **Discord** will be the essential glue that binds the community together.

- **NFT HOLDERS:** an essential element to keep the community engaged. Those who possess a “QBS Tardigrade” NFT will have access to:

- **Exclusive Discord Channels**
- **Giveaways & Raffles (Tangible Items)**
 - Quantumbiosis “Challenge Coins” (physical medallions representing the year the society was founded)
 - Quantumbiosis Society branded merchandise.
- **Live Events**
 - Exclusive access to Society live voice channel/X spaces events.
 - In-person events.
- **Giveaways & Raffles (Digital Items)**
 - NFTs from collaborating NFT projects.
 - Twenty-four (24) Legendary standalone Quantumbiosis NFTs.
- **BRANDED MERCHANDISE**
 - Made available for sale and for giveaways.

VISION

- Build a thriving community and maximize the ownership and value of the “Quantumbiosis Tardigrade” NFT.
- Collaborate with other NFT companies for cross-community relationship building.
- Expand the team to meet growing needs.
- Include the community in discussions for the future direction of the society.

TOKENOMICS

[NFT NAME]: "QUANTUMBIOSIS TARDIGRADE"

[NFT SUPPLY #]: 10,000

GLOSSARY OF USEFUL TERMS

Blockchain: A system of recording information in a way that is decentralized and makes it difficult or impossible to change or hack. **Custodial:** A trusted entity stores/ holds cryptographic keys that provide access to assets on behalf of the consumer

Cryptocurrency: A form of digital currency created by solving a complex series of cryptographic equations. Once “minted”, the crypto exists on a blockchain and is decentralized, meaning it is not controlled by a singular entity the way all traditional currencies are. (e.g., Bitcoin and Ethereum)

Crypto Exchange: A marketplace to buy and sell assets/currencies. (e.g., Coinbase) **Ethereum:** A decentralized, open source blockchain with smart contract functionality.

Ethereum (ETH): A type of digital currency that is created, distributed, traded, and stored with the use of a decentralized ledger system, known as a blockchain.

Fiat Currency: A government-issued currency that is not backed by a commodity such as gold. Fiat money gives central banks control over the economy because they can control how much money is in circulation.

NFT (Non-Fungible Token): Tokens that are tied to and/ or represent ownership of an underlying media asset.

Flow: A blockchain that allows developers to create and trade a particular type of digital asset called a non-fungible token.

Fungibility: Something that is replaceable or exchangeable. (e.g., gold or silver)

Blockchain Transaction | Network Fees (Gas): Forms of payment to the miners or stakeholders who help operate the blockchain.

Non-custodial: The consumer is responsible for storing the cryptographic keys that control the tokens themselves. **Non-Fungible** Something that is unique and irreplaceable (e.g., autographed item).

OpenSea: The first and largest marketplace, similar to eBay for NFTs, with millions of assets organized into hundreds of categories for user owned digital goods, including collectibles, gaming items, digital art, and domain names.

Tokenization: The process of turning a meaningful piece of data, such as an account number, into a random string of characters called a token that has no meaningful value if breached.

Stablecoin: A new class of cryptocurrencies that attempts to offer price stability and is backed by a reserve asset.

SuperRare: A marketplace to collect and trade unique, single-edition digital artworks.

Smart Contract: Computer code that executes simple if/then functions.

Metaverse: A virtual-reality space in which users can interact with a computer-generated environment and other users.

API: A set of functions and procedures allowing the creation of applications that access the features or data of an operating system, application, or other service.

White Label: When a product or service removes their brand and logo from the end product and instead uses the branding requested by the purchaser.
